ZNAČAJ, VELIČINA I POTENCIJAL ROBOTIKE

Robotika je multidisciplinarno područje koje uključuje specijalizacije elektrotehnike, strojarstva i računarstva, a danas igra ključnu ulogu u suvremenim ekonomijama diljem svijeta. Roboti se razvijaju, proizvode i primjenjuju u raznovrsnim sektorima industrije, zdravstva, logistike, poljoprivrede, istraživanja svemira i drugih područja.

U svjetskim ekonomijama rastuća uporaba robota pokazuje značajan utjecaj na povećanje produktivnosti, smanjenje troškova proizvodnje te poboljšanje kvalitete proizvoda i usluga.

Hrvatska poduzeća koja se bave robotikom pokrivaju širok spektar razvoja, proizvodnje i primjene robotskih tehnologija: od autonomnih mobilnih robota koje razvijaju Gideon Brothers i Romb Technologies, integratora

kompleksnih robotskih sustava kao što su ATINEL, Codel i Strojotehnika, do razvoja specijalnih robota za nuklearnu industriju (Inetec) i medicinsku primjenu (RONNA Medical).

Kroz ovaj katalog, prikazano je područje rada 18 poduzeća iz područja robotike koja svojim inovativnim pristupom, tehnološkim dostignućima i visokim standardima kvalitete pružaju širok spektar rješenja u robotici diljem svijeta. Ta poduzeća nositelji su inovacija u području robotike u Republici Hrvatskoj, čija rješenja ne samo da prate najnovije tehnološke trendove, već postavljaju i nove standarde u razvoju robotskih rješenja u globalnim okvirima.

SIGNIFICANCE, SIZE AND POTENTIAL OF ROBOTICS

The multidisciplinary field of robotics, drawing on electrical engineering, mechanical engineering, and computer science, plays a vital role in modern economies globally. Robots are developed, produced, and applied across numerous sectors, from industry and healthcare to logistics, agriculture, and even space exploration.

The growing adoption of robots demonstrably increases productivity, reduces production costs, and enhances the quality of products and services, making them a vital player in modern economies worldwide, including Croatia.

Croatian companies are actively involved in the entire spectrum of robotics development, production, and ap-

plication, including pioneering autonomous mobile robots (Gideon Brothers, Romb Technologies), leading complex robotic systems integration (ATINEL, Codel, Strojoteknika), and developing specialized robots for the nuclear industry (Inetec) and medical applications (RONNA Medical).

This publication showcases 18 such companies that deliver a vast array of innovative robotic solutions around the globe. Their achievements in technology and commitment to high standards make them the standard-bearers for robotics innovation in Croatia. These companies not only keep pace with the latest trends but also push boundaries in the global robotics landscape.

PODUZEĆA U REPUBLICI HRVATSKOJ IZ PODRUČJA ROBOTIKE

U Republici Hrvatskoj postoji niz poduzeća koja se bave razvojem, proizvodnjom i primjenom robotskih tehnologija i automatiziranih sustava, ali isto tako certificiranjem, nadzorom i edukacijom u tom području. S obzirom na to da prema Nacionalnoj klasifikaciji djelatnosti (NKD) ne postoji područje koje se odnosi isključivo na projektiranje, istraživanje i razvoj sustava za robotiku i automatizaciju, teško je precizno utvrditi ukupan broj poduzeća koja se bave robotikom u Hrvatskoj, jer su ta poduzeća raspoređena u različitim NKD kategorijama. Međutim, u području NKD kategorija povezanih s aktivnostima robotike, poput 28.22 – Proizvodnja proizvoda za dizanje i prenošenje i 28.99 – Proizvodnja ostalih strojeva za posebne namjene u Republici Hrvatskoj aktivna su 152 poduzetnika koji zapošljavaju nešto više od 2138 ljudi te ostvaruju više od 250 milijuna eura prihoda, od čega 45 % od izvoza i gotovo 30 milijuna eura dobiti.*

U nastavku je detaljniji opis onih poslovnih subjekata koji su iskazali interes za predstavljanje u Katalogu, a detektirani su temeljem vlastitog istraživanja i podataka dobivenih od Regionalnog centra izvrsnosti za robotske tehnologije (CRTA) pri Fakultetu strojarstva i brodogradnje Sveučilišta u Zagrebu. Većina predstavljenih poduzeća bavi se područjem istraživanja, razvoja i proizvodnje roboata i robotiziranih sustava, odnosno softvera za automatizaciju poslovnih procesa, dok je nekoliko poduzeća iz područja edukacije, certificiranja, testiranja i nadzora. Uz kratak opis djelatnosti poduzeća, pronaći ćete popis ključnih proizvoda, odnosno usluga, postojećih certifikata, referenci te kontakt osobe odgovorne za prodaju, odnosno uspostavu suradnje s potencijalnim partnerima u zemlji i inozemstvu.

* Fina (InfoBiz), 2024 za 2022

CROATIAN ROBOTICS COMPANIES

Croatia boasts a dynamic robotics sector, with companies involved in various aspects of the field. These activities include development, production, and application of robotic technologies and automated systems, as well as certification, supervision, and education.

Unfortunately, the Statistical Classification of Economic Activities (NACE) doesn't have a dedicated category for robotics and automation design, research, and development. This makes it difficult to pinpoint the exact number of robotics companies in Croatia, as these companies are spread across various NACE categories.

While precise numbers are elusive, looking at NACE categories related to robotics activities, such as NACE 2822 (Manufacture of lifting and handling equipment) and NACE 2899 (Manufacture of other special-purpose machinery), reveals 152 active companies in Croatia. These companies employ over 2,138 people and generate more than €250 million in revenue, with 45% coming from exports and nearly €30 million in profit.*

This Catalogue provides a short overview of some Croatian robotics companies. These companies were identified through a combination of internal research and data obtained from the Regional Centre of Excellence for Robotic Technology (CRTA) at the University of Zagreb's Faculty of Mechanical Engineering and Naval Architecture.

The majority of companies in this Catalogue focus on research, development, and production of robots, robotic systems, and automation software. A smaller number specialize in robotics education, certification, testing, and supervision.

Each company entry offers a brief description of their activities, along with key products and services, existing certifications, references, and contact information for sales and potential partnerships.

* Fina (InfoBiz), 2024 for 2022

EXPORT MARKETS Germany, Slovenia, Hungary, Serbia, Bosnia and Herzegovina, Montenegro, Kosovo

Poduzeće za inženjerstvo u automatsici, telekomunikacijama, informatici i elektrici. Radi za neka od najvećih i najvažnijih imena u auto industriji u području automatizacijskih usluga i savjetovanja.

Kućanska ulica 2, Varaždin
www.atinel.hr

Specialized company that strives to deliver unparalleled automation services for large-scale companies throughout the world. They have been working for the largest, most notable car industry companies delivering top-notch automation services and counseling.

PROIZVODI

- programiranje i puštanje u pogon PLC-ova i industrijskih robota
- virtualno puštanje u pogon
- ADAPTO sustavi za različite aplikacije s kolaborativnim robotima
- izrada rješenja „ključ u ruke“
- elektroprojektiranje
- izrada elektro-upravljačkih ormara

KEY PRODUCTS

- programming and commissioning of PLCs and industrial robots
- virtual commissioning service
- ADAPTO systems for various applications with collaborative robots
- creation of turnkey solutions
- electrical design
- production of electrical switchboards

AUTRON

**Poduzeće za automatizaciju i robotiku
čija stručnost leži u projektiranju i izradi
robotskih sustava za industrijsku automa-
tizaciju, pružajući pritom visokokvalitetna
rješenja prilagođena jedinstvenim potre-
bama kupaca te obuhvaćajući cijelokupni
proces od konceptualnog razvoja ideje do
implementacije krajnjeg sustava.**

Ulica bana Josipa Jelačića 22B,
Čakovec
www.autron.hr

An automation and robotics company who specializes in the design and manufacture of robotic systems for industrial automation, providing high-quality solutions tailored to the unique customer needs and covering the entire process from the conceptual development to the implementation of the final system.

Nikola Kirić
nikola@autron.hr
+385 98 965 5417

PROIZVODI

- proizvodnja robotskih stanica
- nadogradnja robotskih stanica
- izrada naprava i gripera
- programiranje robota (OLRP)
- optimizacija robotskih procesa
- proizvodnja strojeva posebne namjene

KEY PRODUCTS

- production of robotic cells
- upgrading robotic cells
- designing jigs and grippers
- robot programming (OLRP)
- optimization of robotic processes
- manufacturing of custom-purpose machines

KAPACITET PROIZVODNJE

2-10 robotskih stanica - ovisno o kompleksnosti stanice

ANNUAL PRODUCTION CAPACITY 2-10 robotic cells – depending on the cell complexity

BYTE LAB GRUPA

Inovativno inženjersko poduzeće sa sjedištem u Zagrebu. Njihovo stručno područje obuhvaća niz usluga, uključujući razvoj električkih proizvoda, inženjerske usluge (razvoj ugrađenog softvera i hardvera) te prototipiranje i proizvodnju – pružajući sveobuhvatno rješenje za potrebe dizajna i proizvodnje elektronike.

Medarska ulica 69/1, Zagreb
www.byte-lab.com

An innovative engineering company based in Zagreb. Their expertise includes a range of services, including electronic product development, engineering services (embedded software and hardware development), and prototyping and manufacturing – providing a comprehensive solution for design and electronics manufacturing needs.

Josip Puškar
puskarj@byte-lab.com

PROIZVODI

- Razvoj i proizvodnja električkih uređaja
- Razvoj embedded softvera i hardvera
- Gasread AMR – Uredaj za daljinsko očitanje plinomjera
- TS-AQU-LORA -Telemetrijski uređaj za nadzor trafostanica
- Kontroler AC uređaja

KEY PRODUCTS

- Development and manufacturing of electronic devices
- Embedded software and hardware development
- Gasread AMR – Remote gas meter reading device
- TS-AQU-LORA - Telemetry device for substation monitoring
- AC unit controller

HENNICH INDUSTRUJSKA TEHNIKA

Osnovna djelatnost poduzeća je prodaja, montaža i servis industrijskih proizvoda na bazi ekskluzivnih zastupanja renomiranih inozemnih proizvođača. Pored zastupanja pokrenuta je i vlastita proizvodnja robot-skih (automatiziranih) sustava, izmenjivača topline, zračnih hladnjaka, hidrauličnih brtvi, vodenih topova i sl. Zbog širokog prodajnog assortimenta, u mogućnosti su ponuditi rješenja „ključ u ruke“.

The main activity of the company is the sale, assembly, and service of industrial products on the basis of exclusive representation of renowned foreign manufacturers. In addition to representation, they also started their own production of robotic (automated) systems, heat exchangers, air coolers, hydraulic seals, water guns, etc. Due to their wide range of products, they are able to offer customers turnkey solutions.

PROBOTICA

Poduzeće koje nudi širok spektar usluga u područjima robotike, mehatronike i procesne industrije. Njihovo stručno znanje leži u stvaranju inovativnih proizvoda i pružanju sveobuhvatnih usluga u području robotike i mehatronike. Njihov tim samostalno pokriva tri ključne discipline bitne za razvoj robotike: mehanički dizajn, elektroniku i razvoj softvera.

Slavonska avenija 6A, Zagreb
www.probotica.hr

Offers a wide range of services in the fields of robotics, mechatronics, and the process industry. Their expertise is creating innovative products and offering comprehensive services in robotics and mechatronics. Their team independently covers the three essential disciplines crucial for robotics development: mechanical design, electronics, and software development.

Miljenko Hrman
miljenko.hrman@probotica.hr

PROIZVODI

- Razvoj mobilnih robotskih sustava
- Razvoj softvera u okolini ROS/ROS2
- Mehanički razvoj robotskih sustava
- Razvoj i podrška certifikaciji proizvoda

KEY PRODUCTS

- Mobile robot development
- Software development in the ROS/ROS2 environment
- Mechanical design of components and robotic systems
- Development and product certification support

PURIĆ

Odjel automatizacije i robotike (Damko)
poduzeća Purić integrator je elemenata
automatizacije i proizvođač vlastitih rje-
šenja. Prostor razvojnog centra pouzeća,
omogućava sastavljanje kompletnih linija
te puštanje u pogon i podešavanje prije is-
poruke i ugradnje na konačnu adresu kupca
(tzv. "FAT").

Company's Automation and Robotics Department (Damko) is an integrator of automation elements and a manufacturer of proprietary solutions (machinery). The Company's development center is equipped to assemble full production lines, ensuring they are fully operational and fine-tuned before being delivered and installed at the client's site (so-called 'FAT').

PROIZVODI

- Automatizirane proizvodne linije, linije za pakiranje, paletiranje, integracija robotskih ruku, sustavi računalnog vida sustavi bazirani na umjetnoj inteligenciji, autonomne robotske platforme (AGV), digitalizacija proizvodnih procesa itd.

KEY PRODUCTS

- Automated production lines, packaging lines, palletizing lines, integration of robotic arms, Artificial intelligence-based computer vision systems, autonomous robotic platforms, digitization of manufacturing processes etc.

KAPACITET PROIZVODNJE 5–8 većih proizvodnih linija godišnje, 10 manjih projekata godišnje

ANNUAL PRODUCTION CAPACITY 5–8 larger production lines, 10 smaller projects per year

STANDARDI I CERTIFIKATI STANDARDS AND CERTIFICATES ISO 9001

Poduzeće za razvoj softvera za autonomnu navigaciju u intralogistici. Njihovi moduli rješavaju ključne probleme poput izgradnje karte, lokalizacije, planiranja i praćenja putanje. Njihova rješenja se lako integriraju s postojećim procesima, povećavajući pouzdanost i učinkovitost logističkih operacija.

Martićeva 55, Zagreb
romb-technologies.hr

IT firm that develops software for autonomous navigation in intralogistics. Their modules tackle key issues like mapping, localization, planning, and path tracking. Their solutions integrate seamlessly with existing processes, boosting reliability and efficiency in logistics operations.

PROIZVODI

- navigacijski softver za rukovanje materijalom
- izrada karte prostora
- lokalizacija
- precizno praćenje putanje
- softver za projektiranje AGV putanja, puštanje u pogon i praćenje operacija
- integracija hardvera i softvera za AGV/AMR
- specijalizirani razvoj i obuka za navigacijske sustave visoke točnosti
- obrazovanje iz mobilne robotike

KEY PRODUCTS

- Navigation software for material handling
- Map building

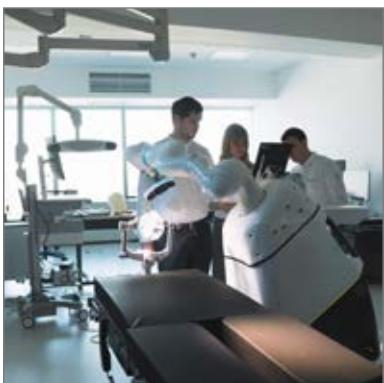

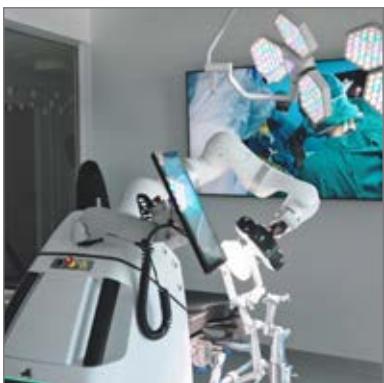

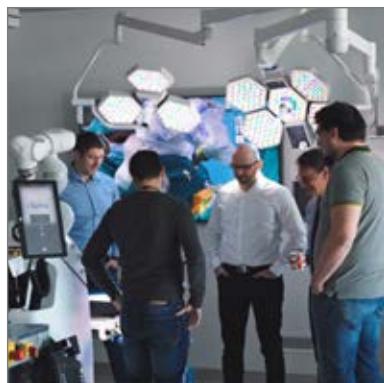

- Localization
- Accurate path following
- AGV Roadmap design, commissioning and monitoring software
- Hardware and software integration for AGVs/AMRs
- Specialized development and training for high-accuracy navigation systems
- Mobile robotics education

RONNA MEDICAL

Poduzeće razvija vrhunske medicinske proizvode, integrirajući najnovije tehnologije za poboljšanje zdravstvene skrbi. Njihov glavni proizvod, RONNA G6, je neurokirurški robotski sustav nove generacije s haptičkom povratnom informacijom za veću sigurnost i preciznost tijekom operacija. Funkcije poput automatske lokalizacije pacijenta i autonomne vožnje čine ga vrhunskim izborom za kirurge.

Slavonska avenija 6, Zagreb
www.ronna-medical.com

The company develops cutting-edge medical products, integrating latest technologies to improve healthcare. Their key product, the RONNA G6, is a next-generation neurosurgical robotic system with haptic feedback for increased safety and precision during operations. Features like automatic localization and autonomous driving make it a top choice for surgeons.

Andrei Krapotkin, managing director

PROIZVODI

- Modularni robotski sustav RONNA G6
- RONNA stanica za planiranje
- autonomna mobilna platforma
- stereovizijska kamera „RONNA vision“
- RONNA vodilica alata

KEY PRODUCTS

- Modular robotic system RONNA G6
- RONNA planning station
- autonomous mobile platform
- stereotactic camera “RONNA vision”
- RONNA tool guide

KAPACITET PROIZVODNJE 5–6 robotskih sistema RONNA G6

ANNUAL PRODUCTION CAPACITY 5–6 robotic systems RONNA G6

STEMI

Izrađuje Netflix platformu za STEM obrazovanje namijenjenu učenicima osnovnih i srednjih škola koja će nuditi STEM programe temeljene na projektima u području suvremenih tehnologija poput umjetne inteligencije, interneta stvari, robotike, kibernetičke sigurnosti, blockchaina, AR-a itd. Nudi jedinstvene STEM programe temeljene na industriji koji su rješenja spremna za upotrebu u učionici, prilagođeni tempu učenika, uz temeljitu obuku nastavnika i podršku u provedbi uživo.

R. Matejčić 10, Rijeka
stemi.education

An ed-tech company that is building a STEM education Netflix Platform for middle and high school students with project-based STEM programs in modern technologies such as AI, IoT, robotics, cybersecurity, blockchain, AR, etc. They offer unique, industry-based STEM programs that are plug-and-play solutions for the classroom, student-paced and come with thorough teacher training as well as in-person support in implementation.

STROJOTEHNIKA

Poduzeće specijalizirano za robotiku, automatizaciju i proizvodnju specijalnih strojeva. Njihov tim stručnjaka razvija i implementira prilagođene robotske sisteme, automatizirane linije i specijalne strojeve kako bi zadovoljili specifične potrebe klijenata. Mogu ponuditi konstrukcijsku razradu, elektroprojektiranje, PLC programiranje, programiranje robota, proizvodnju dijelova u vlastitim kapacitetima, elektro i mehaničku montazu, te naposljetku puštanje u pogon kod klijenta.

Zagorska 10, Sobljinec,
Grad Zagreb
www.strojotehnika.hr

Company that specializes in robotics, automation, and the production of special machines. Their team of experts develops and implements customized robotic systems, automated lines, and specialty machines to meet the specific needs of their clients. They can offer structural development, electrical design, PLC programming, robot programming, production of parts in our own capacity, electrical and mechanical assembly, and finally commissioning at the client's location.

V&R AUTOMATED SYSTEMS

Nude rješenja po principu „ključ u ruke“ za automatizaciju rukovanja materijalom.

Nadogradnjom provjerениh viličarskih platformi s najsvremenijom senzorskom i računalnom opremom i softverom, mogu ponuditi automatizirano vođena vozila (AGV) s vodećim mogućnostima na tržištu. Njihova se rješenja integriraju u postojeće tijekove rada kako bi se poboljšala učinkovitost i pouzdanost logističkih operacija njihovih klijenata.

Ivana Keleka 18a, Sesvete
www.vandr-as.hr

They provide turnkey solutions for material handling automation. By upgrading proven brand-name forklift platforms with state of the art sensing and computing equipment, and software, they can offer automated guided vehicles (AGVs) with market-leading capabilities. Their solutions integrate into existing workflows to improve the efficiency and reliability of their client's logistics.

PROIZVODI

- Automatizirano vođena vozila (AGV)
- Rješenja ključ u ruke za automatizaciju procesa rukovanja materijalima

KEY PRODUCTS

- Automated guided vehicles (AGVs)
- Turnkey solutions for material handling process automation

KAPACITET PROIZVODNJE 5 AGV strojeva

ANNUAL PRODUCTION CAPACITY 5 AGVs

KONTAKTI

Autor ove publikacije pod nazivom Katalog hrvatskih proizvođača – ROBOTIKA je Ministarstvo gospodarstva i održivog razvoja, a partner Regionalni centar izvrsnosti za robotske tehnologije (CRTA) pri Fakultetu strojarstva i brodogradnje Sveučilišta u Zagrebu.

Uprava za internacionalizaciju pri Ministarstvu zadužena je za pružanje podrške domaćim poduzećima u procesu izlaska na strana tržišta, ali i stranim investitorima koji ulažu u Republiku Hrvatsku.

CONTACTS

The author of the publication Catalogue of Croatian Manufacturers – ROBOTICS is the Ministry of Economy and Sustainable Development, with the partner Regional Centre of Excellence for Robotic Technology (CRTA) at the Faculty of Mechanical Engineering and Naval Architecture, University of Zagreb.

The Ministry's Directorate for Internationalization is responsible for providing support to domestic companies in the process of entering foreign markets, as well as to foreign investors investing in the Republic of Croatia.
